---

## PROFILE

Emerging software engineer with a solid academic foundation in Information Science and Engineering. Hands-on experience across diverse technologies with a strong focus on C, C++, and Java development. Proficient in Data Structures and Algorithms (DSA), eager to contribute innovative solutions to complex challenges and continually advance expertise in a professional environment.

## EDUCATION

### Bachelor of Engineering (B.E), Information Science and Engineering

Acharya Institute of Technology

**Pre-University (PCMB) — 95%** | 2021–2022

Sir M V PU College

**SSLC / 10th — 94%** | 2019–2020

Sri Adichunchanagiri Vidhyavardhaka Trust (SAV)

## SKILLS

**Languages:** C, C++, Java (OOPs & Advanced), JavaScript, Python (Data Visualization), LaTeX

**Frontend:** HTML, CSS, React.js

**Backend:** Java

**Technologies:** Git, DBMS, UNIX OS

**Tools:** VSCode, Eclipse, MySQL, Google Colab, GitHub

## PROJECT

### IoT & AI Based Smart Waste Management System

- Developed an IoT smart waste bin segregating waste into biodegradable, non-biodegradable, and recyclable categories using load, moisture, and IR sensors.
- Built a cloud-connected dashboard for real-time bin monitoring with automatic threshold alerts and an eco-point reward system.
- Implemented microcontroller-based automated bin-lid control; designed a low-power hardware setup for outdoor environments.
- Conducted multiple field tests and calibration cycles to improve sensor accuracy; project recognized at college expo/hackathon events.

## CERTIFICATIONS

- Programming for Everybody (Python) — Coursera
- Git and GitHub — LinkedIn Learning
- Basics of UNIX — Infosys Springboard
- Basics of C Programming Language — Infosys Springboard
